RESEARCH EXPERIENCE

Department of Computer Science, Cornell University

Research Assistant to Prof. Thorsten Joachims

Ithaca, USA

Jun 2019 - Oct 2019

- Designed a learning-to-rank algorithm to learn the ranking policy from implicit feedback with fairness constraints and completed empirical evaluations. A first-author (equal contribution) paper is under review in *The Web Conference (WWW)* 2020.

Department of Computer Science and Technology, Tsinghua University

Research Assistant to Prof. Jie Tang

Beijing, China

Jun 2017 - June 2019

- Proposed an attention-based Convolutional Neural Network (CNN) for related article recommendations, combined a one-shot function to provide personalized recommendations and completed empirical evaluations. A first-author paper was accepted by *ECML/PKDD* 2018.

¹Equal contribution

- Extended the previous CNN article recommender model with active learning to solve the cold-start problem in article recommendations and completed empirical experiments. A first-author paper is accepted by IEEE TKDE.
- (*Collaborating with Alibaba*) Applied meta learning to solve scenario-aware recommendations in cold-start scenarios and completed empirical experiments. A first-author paper was accepted by KDD 2019.
- (*Collaborating with Alibaba*) Proposed a novel algorithm to infer new facts from existing knowledge graphs with explainable reasoning processes, especially on relation types with only a few training instances and completed empirical experiments. A first-author paper is under review in WWW 2020.
- Helped to run the experiment on one of the three datasets in the paper “EFCNN: A Restricted Convolutional Neural Network for Expert Finding”, which was accepted by PAKDD 2019.
